## Numbers & Oddities

### a.k.a. The Spooks Newsletter

*Edition #211, April 2015*

Editor: Ary Boender email: [udxf@udxf.nl](mailto:udxf@udxf.nl)

Numbers & Oddities <http://www.numbersoddities.nl>

"Numbers & Oddities" a.k.a. the "Spooks Newsletter" is a newsletter for the members of the Utility DXers Forum (UDXF), the Spooks mailing list, HF Underground and everyone else who is interested in Numbers Stations.

"Numbers & Oddities" covers the fascinating world of Numbers Stations and other odd radio signals on shortwave.

Hi all,

First a sad announcement:

Following an Email from Nick Rumple's wife, it appears that my colleague on the Logs Team is in rather a critical, but improving condition in hospital. Nick, who lives in Kannapolis, North Carolina, went out to buy groceries and was involved in a very serious road accident which left him in a coma, with more than 23 broken bones and a collapsed lung. He wasn't expected to have survived Wednesday night, but although he is still unconscious, his condition improved somewhat during Thursday and the medics are optimistic after having restored the collapsed lung. I'm sure you'll join me in wishing him a speedy recovery and a return to the hobby. 73 de Jim, UDXF Team Logs.

I wish you all the best, Nick. I hope that you will recover soon !!! -Ary-

On a brighter note: 21 April marked the 9<sup>th</sup> birthday of UDXF, the Utility DXers Forum. Time flies !!!!

---

## **M51 / FAV22**

### 8ème Régiment de Transmission

Daniel (Danix111) sent us the following note about M51. He also received a QSL. Very nice Daniel. Congratulations !!

*Today I received a QSL card from the notorious CW station M51. It is actually an FAV22 card confirming a non-FAV22 TX! (the time and freq on the front do not match the schedule on the back, nor is any explanation given for that happening). I sent my report on March 31st to this address: BP 10019 / 28170 Favières.*

STATION	DATE	UTC	QRG	MODE	R.S.T
DANIEL	30/03/15	18h04	7528 kHz	FSK 1 (A-1)	/

### EMISSION FAV22 simultanée sur 3,881 et 6,825 Mhz.

Du lundi au vendredi inclus : 10h30 à 11H00 et 13h30 à 14H00.

Le Samedi et dimanche: 09h00 à 09h30 et 10h20 à 10h50.

By the way, as there are no up-to-date M51 profiles, here is the breakdown of M51, as I've figured since January:

- ⇒ Pops up at random during daytime - never at night time. It does not operate continuously and has no predictable schedule.
- ⇒ Has five different TX lengths to choose from: 2.5, 5, 10, 15 or 20 hours. Those are not minute-precise, of course. 20 (\_twenty\_) and 10 (\_ten\_) hours are the most common.
- ⇒ Sends exactly 10 messages an hour.
- ⇒ Every 10th message is sent exactly every hour, +/- a few seconds.
- ⇒ Only 90% of messages are 100 groups long.
- ⇒ Remaining 10% of messages are ~60 groups long, tends to vary +/- a few groups per TX. The truncated messages always occupy the closest time slot before H+00.
- ⇒ Often and deliberately uses incorrect dates. Date in the past does not mean it's a repeat transmission - on April 12th, 2015 there was a TX dated April 8th, which gave completely different messages than the correctly dated April 8th TX. Dates in the future are also in use.
- ⇒ The header counter can only represent 99 messages. 15- and 20-hour TX's go past 99 messages, but after the counter rolls over, the new messages are not repeats of the previous ones.
- ⇒ It can be paused and resumed. Used whenever they're sending on 3881//6825 kHz, the FAV22 frequencies, around the times FAV22 transmits at. After FAV22 lessons, the next header given is one number up from the last one sent before FAV22.
- ⇒ It actually can transmit while FAV22 is up. On April 16th, 2015 there was a single-freq 2.5-hour TX on 8016 kHz at 0930 - 1200 UTC. The last 30 minutes were sent in parallel with FAV22 on 3881//6825 kHz.

This is not behaviour I'd expect from an apparently strictly training TX. The format, TX length, internal scheduling, constant new crypto traffic (whereas FAV22 uses an officially published predefined set of messages) and usage of frequencies over 10 MHz (up to 20 MHz) all make it obvious that this is MIL Intel and not local CW lessons. On February 20th, 2015 I heard M51 on 16257.5 kHz at 1300z. I often hear M51 on 9213 kHz all night long.

3881 22-04-2015 1448 French Mil. Intel via CNMO TSR Favières-Vernon: NR 82 A 22 16:48:54 2015 = DAGZL NTBLD //6825 kHz  
6825 22-04-2015 1448 French Mil. Intel via CNMO TSR Favières-Vernon: NR 82 A 22 16:48:54 2015 = DAGZL NTBLD //3881 kHz

This one started on 3881//6825 kHz on the 22nd at roughly 1430 UTC. Don't be deceived by the counter, which here suggests that it has been running for over 8 hours. It stayed there until 1505 UTC when it suddenly QSY'd to 9224//9257 kHz. Was it a mistake to put it on 3881//6825 kHz in the first place?

9224 22-04-2015 1529 French Mil. Intel via CNMO TSR Favières-Vernon: NR 89 A 22 17:30:09 2015 = NXWDY VALHG //9257 kHz  
9257 22-04-2015 1529 French Mil. Intel via CNMO TSR Favières-Vernon: NR 89 A 22 17:30:09 2015 = NXWDY VALHG //9224 kHz

An odd feature was that at H+59, when a header was supposed to be given, they actually made awkward mid-group cuts between messages, chopping off the header. This remained in place for 2 or 3 hours, when they seamlessly fixed it \_on the fly\_. Not the first time this happened. Makes me wonder what sort of machine is used for M51. That broadcast stayed on the air for 15-16 hours.

3881 23-04-2015 2133 French Mil. Intel via CNMO TSR Favières-Vernon: NR 18 A 23 23:33:48 2015 = MQMHS MACXI //6825 kHz  
6825 23-04-2015 2133 French Mil. Intel via CNMO TSR Favières-Vernon: NR 18 A 23 23:33:48 2015 = MQMHS MACXI //3881 kHz

This one began on the 23rd at about 2126 UTC, making it the first M51 broadcast that I've heard that commenced in local nighttime. So far all the ones I've heard began in local daytime. Again it used 3881//6825 kHz, but this time clearly on purpose. This definitely wasn't a "CW training night shift" :).

This went on until 0830 UTC the next day (beginning of regular FAV22 traffic), making it ~11 hours (expected 10 hours).

Daniel

[danix111@priyom.org](mailto:danix111@priyom.org)

Dear Mr. Ekmann,

It is with pleasure we confirm your SWL reception report between our State Department in Prague (OLZ 88) and Czech Embassy HF Radio Station in Delhi (OLZ 66) as follow:

Date: APR 07, 2015

Time: 08:30Z

Call sign: OLZ 88

Frequency: 18320.00 kHz

Location: PRAGUE - CZ

Power: 800 W

Modulation: PACTOR-III, F1B/FSK2

Antenna: LP-10, gain 12dB

NDB operates: At least once daily

Best regards & 73

HF Radio detachment  
Milan, OK1KW
